n.m.: not meaningful

⁽A) Adjusted EBITDA is a total of segments measure, adjusted net earnings is a non-GAAP financial measure and adjusted EPS is a non-GAAP ratio. Refer to note 2.3, *Total of segments measures*, note 2.1, *Non-GAAP financial measures* and note 2.2, *Non-GAAP ratios* in the Accompanying Notes to this report for more information on these measures.

 $^{^{(}B)}$ Adjusted EBITDA margin is defined as adjusted EBITDA divided by operating revenues.

⁽A) In Q1 2024, we adjusted our mobile phone postpaid subscriber base to remove very low to non-revenue generating business market subscribers of 105,802.

⁽B) In Q1 2024, we removed 11,645 turbo hubs subscribers from our retail high-speed Internet subscriber base as we are no longer actively marketing this product in our wireless-to-the-home footprint.

⁽C) In Q1 2024, our retail high-speed Internet subscriber base increased by 3,850 business subscribers as a result of a small acquisition.

⁽D) In Q2 2023, our retail high-speed Internet, retail IPTV and retail residential NAS lines subscriber bases increased by 35,080, 243 and 7,458 subscribers, respectively, as a result of small acquisitions.

⁽E) As of Q1 2024, we are no longer reporting retail satellite TV subscribers as this no longer represents a significant proportion of our revenues. As a result, satellite TV subscribers have been removed from our retail TV subscriber base, and we now report exclusively retail IPTV subscribers.

(1) Our results are reported in two segments: Bell Communication and Technology Services (Bell CTS) and Bell Media.

Throughout this report, we, us, our, BCE and the company mean, as the context may require, either BCE Inc. or, collectively, BCE Inc., Bell Canada, their subsidiaries, joint arrangements and associates. Bell means, as the context may require, either Bell Canada or, collectively, Bell Canada, its subsidiaries, joint arrangements and associates.

(2) Non-GAAP and other financial measures

BCE uses various financial measures to assess its business performance. Certain of these measures are calculated in accordance with International Financial Reporting Standards (IFRS or GAAP) while certain other measures do not have a standardized meaning under GAAP. We believe that our GAAP financial measures, read together with adjusted non-GAAP and other financial measures, provide readers with a better understanding of how management assesses BCE's performance.

National Instrument 52-112, Non-GAAP and Other Financial Measures Disclosure (NI 52-112), prescribes disclosure requirements that apply to the following specified financial measures:

- Non-GAAP financial measures;
- Non-GAAP ratios:
- Total of segments measures;
- · Capital management measures; and
- Supplementary financial measures.

This section provides a description and classification of the specified financial measures contemplated by NI 52-112 that we use in this report to explain our financial results except that, for supplementary financial measures, an explanation of such measures is provided where they are first referred to in this report if the supplementary financial measures' labelling is not sufficiently descriptive.

(2.1) Non-GAAP financial measures

A non-GAAP financial measure is a financial measure used to depict our historical or expected future financial performance, financial position or cash flow and, with respect to its composition, either excludes an amount that is included in, or includes an amount that is excluded from, the composition of the most directly comparable financial measure disclosed in BCE's consolidated primary financial statements. We believe that non-GAAP financial measures are reflective of our on-going operating results and provide readers with an understanding of management's perspective on and analysis of our performance.

Below are descriptions of the non-GAAP financial measures that we use in this report to explain our results. Reconciliations to the most directly comparable IFRS financial measures on a consolidated basis are set out earlier in this report.

Adjusted net earnings

The term adjusted net earnings does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define adjusted net earnings as net earnings attributable to common shareholders before severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in

associates and joint ventures, net losses (gains) on investments, early debt redemption costs, impairment of assets and discontinued operations, net of tax and NCI.

We use adjusted net earnings and we believe that certain investors and analysts use this measure, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in associates and joint ventures, net losses (gains) on investments, early debt redemption costs, impairment of assets and discontinued operations, net of tax and NCI. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

The most directly comparable IFRS financial measure is net earnings attributable to common shareholders. Refer to pages 2 and 3 of this report for a reconciliation of net earnings attributable to common shareholders to adjusted net earnings on a consolidated basis.

Free cash flow

The term free cash flow does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define free cash flow as cash flows from operating activities, excluding cash from discontinued operations, acquisition and other costs paid (which include significant litigation costs) and voluntary pension funding, less capital expenditures, preferred share dividends and dividends paid by subsidiaries to NCI. We exclude cash from discontinued operations, acquisition and other costs paid and voluntary pension funding because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

We consider free cash flow to be an important indicator of the financial strength and performance of our businesses. Free cash flow shows how much cash is available to pay dividends on common shares, repay debt and reinvest in our company. We believe that certain investors and analysts use free cash flow to value a business and its underlying assets and to evaluate the financial strength and performance of our businesses. The most directly comparable IFRS financial measure is cash flows from operating activities. Refer to pages 10, 12 and 13 of this report for a reconciliation of cash flows from operating activities to free cash flow on a consolidated basis.

Net debt

The term net debt does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define net debt as debt due within one year plus long-term debt and 50% of preferred shares, less cash, cash equivalents and short-term investments, as shown in BCE's consolidated statements of financial position. We include 50% of outstanding preferred shares in our net debt as it is consistent with the treatment by certain credit rating agencies.

We consider net debt to be an important indicator of the company's financial leverage because it represents the amount of debt that is not covered by available cash, cash equivalents and short-term investments. We believe that certain investors and analysts use net debt to determine a company's financial leverage.

Net debt is calculated using several asset and liability categories from the statements of financial position. The most directly comparable IFRS financial measure is long-term debt. Refer to page 10 of this report for a reconciliation of long-term debt to net debt on a consolidated basis.

(2.2) Non-GAAP ratios

A non-GAAP ratio is a financial measure disclosed in the form of a ratio, fraction, percentage or similar representation and that has a non-GAAP financial measure as one or more of its components.

Adjusted EPS

The term adjusted EPS does not have any standardized meaning under IFRS. Therefore, it is unlikely to be comparable to similar measures presented by other issuers.

We define adjusted EPS as adjusted net earnings per BCE common share. Adjusted net earnings is a non-GAAP financial measure. For further details on adjusted net earnings, see note 2.1 – *Non-GAAP financial measures* above.

We use adjusted EPS, and we believe that certain investors and analysts use this measure, among other ones, to assess the performance of our businesses without the effects of severance, acquisition and other costs, net mark-to-market losses (gains) on derivatives used to economically hedge equity settled share-based compensation plans, net equity losses (gains) on investments in associates and joint ventures, net losses (gains) on investments, early debt redemption costs, impairment of assets and discontinued operations, net of tax and NCI. We exclude these items because they affect the comparability of our financial results and could potentially distort the analysis of trends in business performance. Excluding these items does not imply they are non-recurring.

(2.3) Total of segments measures

A total of segments measure is a financial measure that is a subtotal or total of 2 or more reportable segments and is disclosed within the Notes to BCE's consolidated primary financial statements.

Adjusted EBITDA

We define adjusted EBITDA as operating revenues less operating costs as shown in BCE's consolidated income statements.

The most directly comparable IFRS financial measure is net earnings. The following table provides reconciliations of net earnings to adjusted EBITDA on a consolidated basis.

	Q1 2024	Total 2023	Q4 2023	Q3 2023	Q2 2023	Q1 2023
Net earnings	457	2,327	435	707	397	788
Severance, acquisition and other costs	229	200	41	10	100	49
Depreciation	946	3,745	954	937	936	918
Amortization	316	1,173	299	295	296	283
Finance costs						
Interest expense	416	1,475	399	373	359	344
Net return on post-employment benefit plans	(16)	(108)	(27)	(27)	(27)	(27)
Impairment of assets	13	143	109	-	-	34
Other expense (income)	38	466	147	129	311	(121)
Income taxes	166	996	210	243	273	270
Adjusted EBITDA	2,565	10,417	2,567	2,667	2,645	2,538

(2.4) Capital management measures

A capital management measure is a financial measure that is intended to enable a reader to evaluate our objectives, policies and processes for managing our capital and is disclosed within the Notes to BCE's consolidated financial statements.

The financial reporting framework used to prepare the financial statements requires disclosure that helps readers assess the company's capital management objectives, policies, and processes, as set out in IFRS in IAS 1 – *Presentation of Financial Statements*. BCE has its own methods for managing capital and liquidity, and IFRS does not prescribe any particular calculation method.

Net debt leverage ratio

The net debt leverage ratio represents net debt divided by adjusted EBITDA. Net debt used in the calculation of the net debt leverage ratio is a non-GAAP financial measure. For further details on net debt, see note 2.1, *Non-GAAP financial measures* above. For the purposes of calculating our net debt leverage ratio, adjusted EBITDA is twelve-month trailing adjusted EBITDA.

We use, and believe that certain investors and analysts use, the net debt leverage ratio as a measure of financial leverage.

(2.5) **Supplementary financial measures**

A supplementary financial measure is a financial measure that is not reported in BCE's consolidated financial statements, and is, or is intended to be, reported periodically to represent historical or expected future financial performance, financial position, or cash flows.

An explanation of such measures is provided where they are first referred to in this report if the supplementary financial measures' labelling is not sufficiently descriptive.

(3) Key performance indicators (KPIs)

In addition to the non-GAAP financial measures and other financial measures described previously, we use the following KPIs to measure the success of our strategic imperatives. These KPIs are not accounting measures and may not be comparable to similar measures presented by other issuers.

Adjusted EBITDA margin is defined as adjusted EBITDA divided by operating revenues.

Capital intensity is defined as capital expenditures divided by operating revenues.

Mobile phone blended ARPU is defined as Bell CTS wireless external services revenues divided by the average mobile phone subscriber base for the specified period, expressed as a dollar unit per month.

Mobile phone churn is the rate at which existing mobile phone subscribers cancel their services. It is a measure of our ability to retain our customers. Mobile phone churn is calculated by dividing the number of mobile phone deactivations during a given period by the average number of mobile phone subscribers in the base for the specified period and is expressed as a percentage per month.

Mobile phone subscriber unit is comprised of a recurring revenue generating portable unit (e.g. smartphones and feature phones) on an active service plan, that has access to our wireless networks and includes voice, text and/or data connectivity. We report mobile phone subscriber units in two categories: postpaid and prepaid. Prepaid mobile phone subscriber units are considered active for a period of 90 days following the expiry of the subscriber's prepaid balance.

Mobile connected device subscriber unit is comprised of a recurring revenue generating portable unit (e.g. tablets, wearables, mobile Internet devices and Internet of Things) on an active service plan, that has access to our wireless networks and is intended for limited or no cellular voice capability.

Wireline subscriber unit⁽¹⁾ consists of an active revenue-generating unit with access to our services, including retail Internet, IPTV, and/or residential NAS. A subscriber is included in our subscriber base when the service has been installed and is operational at the customer premise and a billing relationship has been established.

- Retail Internet and IPTV subscribers have access to stand-alone services, and are primarily represented by a dwelling unit or a business location
- Retail residential NAS subscribers are based on a line count and are represented by a unique telephone number

⁽¹⁾ As of Q1 2024, we are no longer reporting retail satellite TV subscribers as this no longer represents a significant proportion of our revenues. As a result, satellite TV subscribers have been removed from our retail TV subscriber base, and we now report exclusively retail IPTV subscribers.
